

▶ **PROBIZNESBANK CONTINUES ITS  
COLLABORATION WITH KASPERSKY LAB**

## FINANCE & INSURANCE

- Founded in 1993
- One of Russia's top 100 banks

To successfully manage all its operations and clearly communicate with its internal staff and external partners, Probiznesbank needs to ensure all its processes are available around the clock. This is impossible without reliable protection for its IT infrastructure.

Probiznesbank, one of Russia's 100 largest banks, continues to use Kaspersky Lab solutions to protect its IT infrastructure. In total, over 14,000 licences have been extended for Kaspersky Endpoint Security for Business and a further 10,000 licenses for Kaspersky Endpoint Security for Mail Server. Thanks to these products, the file and mail servers at Probiznesbank's various divisions and staff work places around the country, are reliably protected against all kinds of cyber threats, both external and internal.

### Challenge

Probiznesbank needed a solution which could ensure the data confidentiality and effectively block harmful viruses. Kaspersky Endpoint Security for Business meets all the company's requirements and offers additional advantages, such as central management of the protection system, rapid response to incidents, and more.

In addition to protecting work places, the Kaspersky solution makes it easier to control mobile devices' access to the corporate network, ensuring reliable data protection, which is a critical factor in the financial sector. Kaspersky Security for Mail Server effectively protects the bank's mail system from unwanted messages and viruses. The smart spam filter and optimized use of system resources mean that the load on the corporate network can be significantly reduced and stable operation is ensured.

## SECURE

Probiznesbank has experienced a drop in the volume of spam in the network and an enhanced level of IT security

## COST

The bank is saving money thanks to a reduction in administrative resources

## CONTROL

A convenient single management center and detailed reports on all aspects of the work of the solution

Kaspersky's reputation as the leading antivirus software producer in Russia and one of the world leaders, was a significant factor in the decision to extend the partnership. Kaspersky specialists provide prompt, effective technical support for any issue that arises.

### The Kaspersky Solution

With a growing number of devices and an increasingly complex corporate IT infrastructure, Probiznesbank has greater demands for data protection. Sensitive data is now stored not only on stationary devices, but on smartphones and tablets that can be lost or stolen.

Kaspersky Endpoint Security for Business minimizes the risk of system downtime and losing valuable data. In turn, Kaspersky Security for Mail Server effectively fights spam, even in the cloud.

### Effective protection and first class support

Probiznesbank staff appreciate the effectiveness of the Kaspersky's solutions and note how the company's products are constantly being improved. Denis Makarov, head of the department for the introduction and administration of information protection systems, highlighted the following key advantages of the Kaspersky products: a drop in the volume of spam in the network, an enhanced level of IT security, savings in administrative resources, simplicity of management and an ideal combination of fast action and low system load. He notes that the system was deployed without a hitch and whatever the difficulties encountered during the course of work, Kaspersky operatives are always on hand to provide effective technical support.

The easy installation process, a convenient single management centre and detailed reports on all aspects of the work of the solution make Kaspersky products the optimum choice for a bank with a complex infrastructure. Probiznesbank plans to extend its relationship with Kaspersky Lab in the future.
