ACTIONABLE INTELLIGENCE THAT MATTERS*

KASPERSKY FRAUD PREVENTION SERVICES

ACTIONABLE INTELLIGENCE THAT MATTERS*

The emergence of online financial services has created a whole new set of risks and the elimination of those risks requires specific expertise. Banks and other financial institutions are experts in their field of financial transactions, but that is not enough when faced with cyber-threats. However, this knowledge gap can easily be filled with the help of security experts.

Cybercriminals have many tools at their disposal and will utilise whatever is required to conduct a successful attack. For this reason, effective fraud prevention must be built on a foundation of comprehensive threat expertise, and not just based on financial malware threats.

Kaspersky Lab has a deep threat perspective on both a local and global scale and we are ready to share our knowledge with you in many different formats.

Kaspersky Security Network, the world's most advanced global intelligence network unites millions of users from more than 200 countries. Our top security experts from the Global Research & Analysis Team (GReAT) are located in 16 countries around the world, and are supported by 30 Kaspersky offices in 29 countries. This global perspective combined with local insight empowers Kaspersky Lab to monitor both the macro and micro threat landscapes, ensuring that our customers remain protected against threats originating anywhere in the world.

Only Kaspersky Fraud Prevention's combination of intelligence and technology allows you to focus on your business, and not be distracted by security.

Professional Services

Today, cyber-attacks on banks are highly sophisticated and organisations like yours may require analysis and investigation of specific attacks – Professional Services from Kaspersky Lab. We are a world leader in malware analysis, detecting and combating threats such as Red October – a series of attacks against computer networks targeting government agencies. Our experts also discovered Gauss, a cyber-threat designed to monitor online banking accounts, and our research thus far shows the majority of users affected are in the Middle East.

Our highly customisable Fraud Prevention Professional Services portfolio delivers incident investigation and malware analysis, providing you with detailed reports on the results of these procedures.

Intelligence Services

Kaspersky's Fraud Prevention Intelligence Services provide customised reporting, delivering unmatched visibility into your specific environment and a wider global perspective and insight.

As part of our intelligence services you will receive monthly or quarterly reports about the financial threats active during the reporting period.

Educational Services

Get access to the experts with Education Services – ranging from working with your team on a customised deployment, to educational briefings, dedicated incident investigation and forensics by the people who fight cyber-threats on a daily basis.

Kaspersky Fraud Prevention Educational Services include practical cyber-security insights and analysis of online banking threats with theory and practice sessions.

Management Services

Consult a dedicated Security Account Manager – your interface to Kaspersky's expertise. During the working week the account manager will be your key point of contact and their availability will be tailored to your specific organisational needs.

Why choose Kaspersky Fraud Prevention Services?

- ▶ Delivered by industry-leading security experts with more than 16 years of experience
- ▶ We focus on threats that are currently active, providing hands-on experience
- ▶ We provide details of all the latest cybercriminal techniques and scams
- ▶ With over 25 offices around the globe training can be carried out in a location that suits you
- ▶ We work closely with Interpol and CERTs around the world
