

REMOTE SERVICE: HEALTH CHECK

Are you currently making the most of your investment in Kaspersky Lab software? Optimization of your deployment is important, as anti-malware is the foundation of your security strategy. That's why we recommend a regular Health Check to ensure you're getting the most out of your investment in Kaspersky Lab software. Schedule your Health Check to ensure you're always ahead of preventable threats.

Why use our remote Health Check services?

While accessing your environment remotely and with your active participation, our expert technician will ensure you're using best practices, have the most optimal settings and make efficient use of our centralized management software. At the end of your Health Check, you'll have a set of recommendations to optimize your Kaspersky Lab software, minimize disruptions and enhance security for your environment.

Your remote Health Check includes verification and review of ...

- Client discovery settings
- Update settings within the Administration Server
- Workstation, Server and Network Agent Policies, Update Tasks and Scan Task
- Backup of the Administration Console data
- Tasks for specific computers
- Quarantine, Backup and Unprocessed file containers
- Licensing
