

Kaspersky Endpoint Security 10 for Windows

User Manual. Addendum A (version 1.03)

Purpose of this Addendum

This Addendum is created to clarify cross-reference between two documents: 'Security Target for Kaspersky Endpoint Security 10 for Windows with Kaspersky Full Disk Encryption 3.0' and 'Kaspersky Endpoint Security 10 for Windows, User Manual'.

Reference and Terms

Kaspersky Endpoint Security 10 for Windows with Kaspersky Full Disk Encryption 3.0 (version 10.3.0.6294 AES256), in User Manual is also referred to as **Kaspersky Endpoint Security 10 for Windows** or **TOE**.

Reference	User Manual	Version
[ST] or Security Target	Security Target for Kaspersky Endpoint Security 10 for Windows with Kaspersky Full Disk Encryption 3.0	1.00
[FSP]	Functional Specification for Kaspersky Endpoint Security 10 for Windows with Kaspersky Full Disk Encryption 3.0	1.03
[UGD] or User Manual	Kaspersky Endpoint Security 10 for Windows, User Manual	1.03

User roles in TOE

[ST] defines that TOE provides two roles KLUser and KLAdmin.

Mapping between naming in different documents are documents is as follows:

Security Target	User Manual
KLAdmin	Administrator
KLUser	User

Administrators here are not to be mixed up with users with Administrative privileges in Operating System.

Available interfaces

Only interfaces that support management functions can associate users with roles. Following table summarize interface availability to Roles:

TSFI as defined in [FSP]	KLUser	KLAdmin
TSFI-PBA	X	
TSFI-CMD	X	X
TSFI-XPL	X	
TSFI-GUI	X	X
TSFI-KSC		X
TSFI-FLT	X	
TSFI-FDE	X	

User is associated with Administrator role when he enters valid username and password when performing operations in GUI or Command Line interface. Additionally all actions done through Kaspersky Security Center are also attributed to Administrator role.

Interfaces descriptions

This section describes how interface description in [UGD] relates to interfaces defined in [FSP].

TSFI-PBA

This interface usage is described in [UGD] in “Using Authentication Agent” chapter.

TSFI-CMD

This interface usage is described in [UGD] in “Managing the application from the command prompt” chapter.

TSFI-XPL

This interface usage is described in [UGD] in “Application functions in the Windows context menu” chapter.

TSFI-GUI

This interface usage is described in [UGD] in “Managing the application on a client computer” section (with the exception of aforementioned “Application functions in the Windows context menu” chapter).

Most of described functionality will be available only to KAdmin role. If product setup and policy definitions are done correctly KUser role will be able to use this interface to view reports and run group task that were defined by KAdmin – see “Scanning the computer” section.

TSFI-KSC

This interface usage is described in [UGD] in “Remote administration of the application through Kaspersky Security Center” chapter. Please note that this describes using Kaspersky Security Center user interface for management, where Kaspersky Security Center relates this command to TOE through TSFI-KSC via API described in [FSP].

TSFI-FLT

This program interface is not visible to users so it is not described in [UGD].

TSFI-FDE

This program interface is not visible to users so it is not described in [UGD].

Known Malware

Follows is the list of malware objects that are considered “known malware” and are always to be detected by TOE with offline bases.
