kaspersky

On-site Training: Security & Management Essentials

Choose expert training for Kaspersky Security Center and Kaspersky Endpoint Security.

Experience three days of on-site instruction from a Kaspersky expert

Explore core functionality of Kaspersky Security Center and Kaspersky Endpoint Security

Review most common scenarios for deployment and maintenance

Discover "Select"-level protection techniques, including management of anti-malware and endpoint

Enroll your team in this expert-led training agenda:

Unit 1 – Deployment	
Chapter 1. How to deploy Kaspersky Endpoint Security for Business Chapter 2. How to install Kaspersky Security Center Chapter 3. How to install Kaspersky Endpoint Security on computers Chapter 4. How to organize computers into groups	Lab 1. How to Install Kaspersky Security Center Lab 2. How to deploy Kaspersky Endpoint Security Lab 3. How to create a structure of managed computers

Unit 2 – Protection Management	
Chapter 1. How Kaspersky Endpoint Security protects computers Chapter 2. How to configure File Protection Chapter 3. How to configure protection against network threats Chapter 4. How to configure protection against sophisticated threats Chapter 5. How to control network connections Chapter 6. How to protect computers outside the network Chapter 7. What else is there in protection and why	Lab 4. How to test File Threat Protection Lab 5. How to configure Mail Threat Protection Lab 6. How to test Web Threat Protection Lab 7. How to test protection of network folders against ransomware Lab 8. How to check health of Exploit Prevention Lab 9. How to test protection against fileless threats Lab10. Improve workstations' protection against ransomware Lab11. How to test Network Threat Protection Lab12. How to configure exclusions from self-defense Lab13. How to configure password protection

Unit 3 – Control	
Chapter 1. General Chapter 2. Application Control Chapter 3. Device Control Chapter 4. Web Control Chapter 5. Adaptive Anomaly Control	Lab14. How to configure Application control Lab15. How to block start of unknown applications in the network Lab16. How to block USB flash drives Lab17. How to configure granular permissions for USB flash drives Lab18. How to configure web access control Lab19. How to configure Adaptive Anomaly Control

Unit 4 – Maintenance	
Chapter 1. How to maintain protection Chapter 2. What to do daily Chapter 3. What to do if something has happened Chapter 4. What to do from time to time	Lab20. How to configure the dashboard Lab21. How to configure maintenance tools Lab22. How to collect diagnostic information
