KASPERSKY SECURITY SOLUTIONS

The Power to Protect Your Organization

"We believe that every organization – from the smallest business to the largest corporation or government body – should feel empowered to operate without fear of online attack. We have made it our mission to help protect your IT infrastructure against all forms of security threat, from advanced cybercrime and online fraud to simple human error."

Eugene Kaspersky, chairman and CEO,

Kaspersky Lab

THE POWER TO PROTECT YOUR ORGANIZATION

Every business, regardless of size, is at risk from cyberthreats. And the threat level is escalating. New cyberthreats targeting individuals and businesses like yours now exceeds 350,000 unique threats – every day.

To stay ahead, stay safe and mitigate your organization's IT risk, you need security that:

- Is continuously fed by global security intelligence from experts working in the vanguard of threat recognition and analysis, and thinking well ahead of the cybercriminal and fraudster communities.

- Incorporates cutting edge technologies and techniques to detect and eliminate known, unknown and advanced threats. Without compromising overall systems performance and efficiency.

- Operates as a single platform extending seamlessly across physical, mobile and virtual environments, and is managed centrally.

At Kaspersky Lab we can offer the world-leading security intelligence your company needs, and the technology to put it to work, built into a unique comprehensive security platform.

Our solutions are designed in-house to align flexibly with your business objectives; security that works with you, growing and evolving as you do to protect every aspect of your IT infrastructure against various forms of cyber-attack.

Contact us or your IT reseller today to explore how we can help keep your organization safer, better.

AT KASPERSKY LAB, WE:

- Are recognized throughout the world for our leadership and expertise in security intelligence.

- Are the most tested and awarded in independent tests worldwide.

- Work in partnership with international law enforcement agencies, including Interpol, Europol and CERTs.

- Provide the software of choice for 120 OEMs including Microsoft and Amazon.

- Protect over 400 million users and more than 270,000 corporate clients worldwide.

There is a special name for businesses who really understand and care about deploying the most effective IT security. They are called 'Kaspersky Lab customers'. We hope you'll decide to join them.

BEST-OF-BREED SECURITY MADE EASY FOR YOU AND YOUR SMALL BUSINESS

As a small business owner without specific IT skills, you'll find it's simpler than ever to protect your day-to-day operations, from managing online finances to safeguarding your customers' data, with powerful multi-layered security.

Mac and PC protection, our award-winning 'safe-money' security, password management, anti-phishing and anti-spam – these are just some of the technologies at your fingertips, all specially designed to be quick and easy for anyone to install and use.

Kaspersky Small Office Security

THE POWER OF MULTI-LAYERED SECURITY FOR YOUR SMB ENVIRONMENT

Move out of firefighting mode, deploying the most advanced next-generation multi-layered security right across your corporate infrastructure.

With limited time and resources, our powerful integrated security platform and tiered approach, harnessing the expertise of the world's best security intelligence ecosystem, means you can take security to a new level. Every threat vector is covered, your sensitive corporate data and assets are protected and your organization can continue to run smoothly with no disruptions. From a single console, you can see, control and protect your entire IT network, including physical and virtual machines and mobile devices, managing all your security centrally across heterogeneous networks and different offices.

From mail servers to VDI, from vulnerability assessment, patch management and whitelisting to encryption – we have security solutions for every aspect of your IT infrastructure. Everything works seamlessly together under your command, delivering industry-leading protection against known, unknown and even advanced cyberthreats.

Security Tiers:

- Endpoint Security for Business – Select
- Endpoint Security for Business – Advanced
- Total Security for Business
