

▶ KASPERSKY SECURITY FOR INTERNET GATEWAY

The first layer of defense

Secure Internet access for all employees in an organization is one of the central pillars of any business security strategy. Kaspersky Security for Internet Gateway is a world-class anti-malware solution that ensures safe always-on Internet access for your entire workforce.

- Anti-malware protection
- Microsoft® ISA / Forefront® TMG support
- Linux support
- POP3/SMTP mail traffic protection (ISA/ TMG)
- Flexible scanning
- Load balancing
- Scalability
- Fault tolerance
- Backup storage (TMG)
- Intuitive management tools
- Comprehensive reporting

HIGHLIGHTS

POWERFUL PROTECTION, REDUCING DOWNTIME AND DISRUPTION

Kaspersky Labs' award-winning anti-malware engine blocks the latest known and potential malware threats from entering the local network via malicious or dangerous programs. The direct result is minimal disruption to business operations due to malware threats, and a reduction in associated costs.

PERFORMANCE EFFICIENCY THROUGH OPTIMIZATION

Optimized, intelligent scanning technology and load balancing reduce the load on resources, helping to preserve valuable bandwidth without compromising on security performance.

MULTI-PLATFORM SUPPORT

Support for the latest platforms and servers, including proxy servers, makes Kaspersky Security for Internet Gateway a high value solution for organizations handling heavy network traffic volumes in heterogeneous environments. Microsoft Forefront TMG support extends to corporate mail as well as web gateway protection.

STRAIGHTFORWARD MANAGEMENT AND REPORTING

Simple, user-friendly management tools, flexible scan settings and protection status reporting systems ensure you and your administrators can control your security easily and efficiently.

FEATURES

- Always-on, proactive protection from emerging and known malware threats.
- Outstanding malware detection rates combined with minimal false positives.
- Optimized, intelligent scanning technology.
- Real-time scanning of HTTP, HTTPS and FTP traffic from published servers.
- Protection for Squid, the most popular Linux proxy server.
- Convenient tools for installation, management and updates.
- Flexible scanning tools and incident response scenarios.
- Load balancing of server processors.
- Scalability and fault tolerance.
- Comprehensive reporting on network protection status.

FEATURES SPECIFIC TO MICROSOFT FOREFRONT TMG AND ISA SERVERS:

- Real-time monitoring of application status.
- Scanning of VPN-connections.
- Real-time scanning of HTTPS traffic (TMG only).
- Email traffic protection (via POP3 and SMTP protocols).
- Backup storage (TMG only).

APPLICATIONS INSIDE:

- Kaspersky Anti-Virus for Microsoft® ISA Server and Forefront® TMG Standard Edition
- Kaspersky Anti-Virus for Microsoft® ISA Server Enterprise Edition
- Kaspersky Anti-Virus for Proxy Server
