

Chemical products

- São Paulo, Brazil
- Using Kaspersky Endpoint Security for Business
- Building Chemical Products
- 230 Employees
- 3 Production facilities in Brazil

“The partnership with Kaspersky Lab is ongoing and although this was initiated due to the security and quality of the product, it is now mostly down to the exceptional relationship we have developed.”

Ricardo Cardoso dos Santos,
IT Coordinator,
MC-Bauchemie Brazil

mc-buildingchemicals.ie

Protection and security that accompany evolution

MC-Bauchemie is one of the world's largest and most respected companies in the building chemicals industry. Its motto is 'building is caring'.

MC-Bauchemie is a private group of companies founded in Germany in 1961. It has operations in more than 40 countries and over 2,500 employees. MC-Bauchemie offers products for building, protection, repair and restoration of structures, which are developed to the highest quality standards, coupled with excellent technical support.

Challenge

The subsidiary in Brazil was established in 2001 and currently has three production facilities, with 230 employees.

The company has participated in large infrastructure, building and industrial projects throughout the country. Some of the most well-known projects it has worked on are the renovation of the Maracanã stadium for the FIFA World Cup, major works for the 2016 Olympics and the São Paulo subway.

Evolution of the corporate structure and the technological environment have made endpoint security necessary for all computers, including full disk encryption on notebooks due to the risk of theft and access to data, as well as anti-spam solutions for email services.

Secure

Protection from malicious attacks with the exclusive next generation technologies from Kaspersky Lab
Secure data support

Control

Centralized device management
Several company devices can be configured
Single console for management of the entire protected environment

Flexible

Adapts easily to the company's needs
'Machine learning' algorithms provide efficiency and agility in the fight against new threats

Support

Development partnership
Personalized technical support

The Kaspersky Lab solution

MC Brazil contracted Kaspersky Lab to provide security solutions and guidance through the German office. When Ricardo Cardoso dos Santos arrived six years ago to coordinate the IT field, he confirmed that this was a "reliable tool with interesting management". At that time the company was still using version six, essentially functioning as antivirus software.

"MC Brazil has evolved greatly and today clearly acknowledges that data security management is vital for the success of the business," says Ricardo Cardoso dos Santos, IT Coordinator, MC-Bauchemie Brazil.

The company started to look for security focused not only on servers and the core network, but mainly to protect and improve control of users' devices, because they are susceptible to errors and vulnerabilities.

MC decided to put its faith in the Kaspersky Endpoint Security for Business Advanced tool and to develop a closer relationship with local support company N1 IT to update the product, including participation in beta versions to actively protect the company's equipment and network.

"During this evolution, we tested various competitors' tools several times, but we always came back to Kaspersky Lab's solution. Today MC has around 210 protected machines, including desktops, notebooks and physical or virtual servers."

Security, quality and support

"MC experienced a single malware attack in Brazil that was detected immediately thanks to the Kaspersky Lab solution which was already installed on the servers."

"Kaspersky Lab was important because its software detected the attempted attack, prevented it and responded quickly, without MC being affected."

N1 IT

N1 IT provides IT consulting for business in the field of hardware and software acquisition, storage, environment virtualization, technical support and cloud services. It has professionals specialized in software licensing, including technologies by Kaspersky Lab.
