Protection while you work

**TAILOR-MADE SECURITY
FOR SMALLER BUSINESSES.
NO HALF MEASURES.
NO SHORT-CUTS.
JUST A PERFECT FIT**

Smaller businesses face many of the same security threats as large enterprises. But they don't have the same resources to deal with them.

That's why Kaspersky Lab developed **Kaspersky Small Office Security**.

Designed specifically for businesses with 5-25 users, it's easy to install, even easier to manage and provides the world's most-tested, most-awarded security to **PCs, file servers, laptops and mobile devices**, while protecting your business from online attacks, financial fraud, ransomware and data loss.

More than 30 per cent of security breaches occur at companies with less than 100 employees.
And 44 per cent of small-and-medium-sized businesses have been attacked by cybercriminals*.

With **Kaspersky Small Office Security**, you can be sure that when the cybercriminals come, it'll be business as usual for you.

OUT OF THE BOX EASE OF USE.
OUT OF THIS WORLD PROTECTION

Kaspersky Small Office Security isn't a pared down version of an enterprise product, squashed to fit a smaller environment. It's tailor-made security designed specifically for smaller businesses, combining award-winning anti-malware with additional technologies specifically for smaller businesses:

EASY DOES IT
Kaspersky Small Office Security is so easy to use, **anyone can do it**. You get out-of-box simplicity with extended functionality and control. Our **web-based console** means you can manage and monitor security from anywhere you choose — including outsourcing to external specialist.

STAY SAFE ON THE MOVE
Protect Android smartphones and tablets with our mobile security and management technologies. Lock, wipe and locate missing devices — use secure 'containers' to protect sensitive information on employee-owned devices. Filter out spam and time-wasting junk calls while you're at it.

MIND YOUR MONEY
Prevent financial fraud and secure online banking. The award-winning **Safe Money** protects online banking transactions while virtual and secure keyboards prevent keyloggers from stealing your details.

SECURE WEB AND EMAIL ACTIVITY
Stop spyware, phishing and malicious Internet links from hijacking your business. Secure email and web activity against hidden exploits and a malware.

PROTECT SENSITIVE DATA AND SAY NO TO CRYPTOLOCKERS
Secure sensitive data and protect your business from data breaches, fines and lost business with **Backup and Encryption. Anti-cryptor** capabilities stop crypto-lockers and ransomware in their tracks. Attempts at malicious encryption trigger automatic backup and restore.

PROTECT YOUR PASSWORDS
Securely generate, store and synch passwords for easy access from PC, Mac, Android and iOS devices. All you have to do is remember one.

FEEL THE SPEED
Optimized software performance and PC resource consumption give you more efficient traffic flow, faster web loading times and optimized deployments, updates and start-up time.

HIT THE GROUND RUNNING
Before you even launch it, Kaspersky Small Office Security can control application activity on your network, in line with your firewall settings.

MOST TESTED, MOST AWARDED SECURITY
No other vendor can match Kaspersky Lab's success record in independent tests. In 2015 Kaspersky Lab products participated in 94 independent tests and reviews. Our products were awarded 60 first and 77 top-three finishes.

PROTECTION ACROSS PLATFORMS
Kaspersky Small Office Security protects: Windows PCs, laptops and Servers; Mac laptops and desktops; Android smartphones and tablets. Password management is available for Android and iOS devices.

Applications inside: Kaspersky Small Office Security 5 for PC, Kaspersky Small Office Security 5 for File Server, Kaspersky Internet Security 16 for Mac, Password manager, Kaspersky Internet Security for Android.
